### Front End Developer (JavaScript Agile) London to £65k

Front End Developer / JavaScript Developer (Agile JavaScript HAXE OOP). Technology driven sports content platform that connects 150 million users with over 40 different sports every month is seeking a skilled Front End Developer to join their growing team.

As a Front End Developer you'll join an Agile development team focussing on the core platform that allows real-time streaming of live sports events (e.g. Premier League, NFL, NBA, LaLiga) and sports data. Working closely with the UX team you will develop and enhance data visualisations for the digital video services which provide live, real-time statistics. There's a number of interesting and challenging projects in the pipeline.

Offices based in Central London with a "start-up feel", casual dress and a friendly team of technologists.

Requirements:

- Strong JavaScript development experience
- Good knowledge of computing fundamentals such as Object Orientated Programming and Design Patterns
- Eye for design and comfortable working with UX designers
- Advocate of Agile development methodologies (Scrum, Sprints, TDD)
- Great communication and interpersonal skills
- Desirable: HAXE (cross platform toolkit)

As a Front End Developer you can expect to earn a highly competitive salary (to £65k) plus benefits.

Send your CV or call 020 7090 2571 for a confidential discussion about this Front End Developer / JavaScript Developer opportunity.
