Web Developer JavaScript UI - Sports

Posted 5 days ago

London, London, £50000 - £65000 per annum + benefits

Job Type: Permanent

Managed by: Front End & Web Development Team (/disciplines/front-end)

Web Developer / Front End Developer - Multiple Roles (JavaScript HAXE OOP UI / UX). Technology driven sports content platform that connects 150 million users with over 40 different sports every month is seeking a skilled Web Developer to join their growing team.

As a Web Developer you'll join an Agile development team focussing on the core platform that allows real-time streaming of live sports events (e.g. Premier League, NFL, NBA, LaLiga) and sports data. Working closely with the UX team you will develop and enhance data visualisations for the digital video services which provide live, real-time statistics. There's a number of interesting and challenging projects in the pipeline.

Offices based in Central London with a "start-up feel", casual dress and a friendly team of technologists.

Requirements:

*Strong JavaScript development experience
*Good knowledge of computing fundamentals such as Object Orientated Programming and Design Patterns
*Eye for design and comfortable working with UX designers
*Advocate of Agile development methodologies (Scrum, Sprints, TDD)
*Great communication and interpersonal skills
*Desirable: HAXE (cross platform toolkit)

As a Web Developer you can expect to earn a highly competitive salary (£50k to £65k - multiple roles available, dependant on skillset and ability) plus benefits.

Send your CV or call for a confidential discussion about this Web Developer / Front End Developer opportunity.
